LS 288

- The Landsail LS288 is a modern passenger car tyre with a balanced and optimised treadpattern.
- The wide, continuous longitudinal grooves are connected by the lateral diagonal grooves. Combined with the specially designed, rapid water-dispersing transverse grooves on the shoulder, maximum grip is retained and the chance of aquaplaning significantly reduced.
- Available in 13 trough 18 inch

LS 388

- The Landsail LS388 is a passenger car tyre with an optimised tread for the sporting medium-range cars.
- The four wide longitudinal grooves ensure rapid and adequate water dispersion whilst retaining grip on wet road surfaces.
- The composition of the tread also effectively reduces the rolling and contact noises produced by the contact surface of the tyre with the road surface.
- Available in 13 trough 18 inch
- **Available in runflat**

CLV 2

- The Landsail CLV2 is a summer tyre specially designed for Crossovers & SUVs.
- The special rubber compound, the extra reinforced base and the tread design guarantee reliable and predictable handling of large SUVs.
- Available in 15 trough 16 inch

LSV 88

- The Landsail LSV88 is a sturdy van tyre that can stand hard wear.
- The special rubber compound, the strong carcass and the balanced tread guarantee optimal performance when carrying maximum load.
- Available in 14 trough 18 inch

LS 588

- The LS588 is the ideal blend of dry road handling, wet road hydroplaning resistance and special 3-D sipes that enhance traction.
- Special 3-d zigzag sipes help maintain block rigidity by locking together and they create more biting edges for enhanced wet conditions.
- Available in 16 trough 22 inch
- **Available in runflat**

LS 988

- The Landsail LS988 is an Ultra High Performance tyre of very high quality.
- The special V-tread shaped by the transverse grooves increases the grip on both dry and wet road surfaces and guarantees reliable handling and braking. The central transverse grooves guarantee excellent road holding, also at high speeds.
- Available in 16 trough 20 inch
- **Available in runflat**

4-SEASONS VAN

- The unique tread design lets the tyre excel in all seasons.
- The unique dual tread compound gives good grip in all conditions.
- The tyre has the three peak mountain snowflake symbol, which qualifies it as an official winter tyre.
- Available in 15 trough 16 inch

4-SEASONS

- The unique tread design lets the tyre excel in all seasons.
- The unique dual tread compound gives good grip in all conditions.
- The tyre has the three peak mountain snowflake symbol, which qualifies it as an official winter tyre.
- Available in 13 trough 17 inch

WINTERLANDER

- The Landsail Winterlander is a winter tyre developed for passenger cars.
- The silica rubber compound ensures the tyre remains flexible, even at very low temperatures. The V-tread, shaped by the transverse grooves, increases the grip on both wet and snowy surfaces and guarantees reliable braking and handling in wintry conditions.
- Available in 13 trough 18 inch

WINTERSTAR

- The Landsail Winterstar is an SUV winter tyre.
- By adding silica to the rubber compound the tyre remains flexible, also at very low temperatures.
- The central arrow tread increases road holding and maximises braking on wet and snowy surfaces. The very large longitudinal grooves rapidly disperse water and snow, allowing grip, steering and braking to be maintained.
- Available in 16 trough 18 inch

SNOWSTAR

- The Landsail Snowstar is a winter tyre.
- The central longitudinal groove and the 2 zigzag longitudinal grooves ensure rapid dispersion of water and snow, allowing grip, steering and braking to be maintained.
- Available in 15 trough 16 inch

RUNFLAT

- Available in LS388, LS588 & LS988 series
- You can keep driving when you have a flat tyre, which is not possible with a normal tyre. It is possible to drive a distance of 80 km with an adjusted maximum speed of 80km/h on a Landsail with RFT technology.
- Available in 16 trough 20 inch
